

Dear reader!

This is the current edition of Technical News specific for South America.

ContiTech wishes success for you!

The current Newsletter on the subject of drive belts

- New Web Catalog ContiTech
- Kits Catalog updated with pictures
- UNI Tool Elast available

Web Catalog ContiTech

Is available to access on the site www.contitech.de/aam the New Web Catalog ContiTech.

More practical and easy to use, this catalog can find all items available from ContiTech.

Queries can be made directly by the Assembly / Application at ContiTech code and also by reference to the Competition and / or the original code.

This catalog will soon Integrated System PIC (Product Information Center) where instructions and technical information about our products can be found.

In case of questions please contact us by phone (11) 2526-1556 or by email: plinio.zauli@continental-corporation.com.

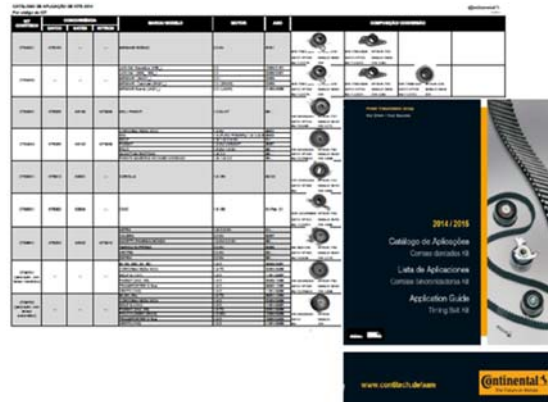

Catalog Kits updated

To facilitate access to information from ContiTech kits, mainly for the clerks of auto parts, we launched a new catalog Kits.

The main news of this catalog are the pages with the pictures of the kit components with the conversion to the competition.

This release is available for [download](#) and if in doubt please get in touch by phone (11) 5070-1100 / 2526-1556 or by email also plinio.zauli@continental-corporation.com.

UNI TOOL ELAST

Is already available the universal tool to installation of elastic belts – Uni Tool Elast.

For appliers that use to buy ContiTech Elastic Belts without tool for installation that come on the kit of this belt, the UNI TOOL ELAST can be used as an alternative to installation of product. Is not necessary to keep the tool that comes on the kit in the garage.

On the link below you can watch a vídeo about it works:
